- Acpc kickoff online individual contest two hundred and fortieth place :
  https://drive.google.com/file/d/1k4UgAqZFiuooAzaiBY_FXbEQ7VDu/

## Recent Work

### Codelabs

- This graduation project, built with React and Next.js, is a platform for sharing and exploring code snippets, known as 'labs.' Users can upload, edit, and render these labs in real time, enabling personalized experimentation. The platform also supports educators by offering virtual classrooms where teachers can manage and interact with students. Additionally, it features a community space for idea sharing and a competitive section for coding challenges, making learning both collaborative and engaging.

### Yolo

- Streamline Your Clinic Operations Welcome to the Yolo Clinic App, the all-in-one solution to streamline and optimize your clinic operations. Take your clinic management to new heights with our powerful and user-friendly app designed specifically for healthcare professionals.
